

# Areas where the skulls might be buried

## Legend

- water\_sources
- trails
- water\_source\_buffer
- 250m ring buffer
- 950m ring buffer

## soils

### soil types

- clay
- dirt
- rock
- sand

**This map is indicating areas where the skulls might be buried - the area with brown border; the skulls are buried likely in sand.**

**The water source buffer around water source points are represented by blue buffer. Similarly, the multiple ring buffer of trail with 250m and 950m are classified by different colours.**

**Moreover, the characteristics of soils are also classified by its type. Please refer to the legend for more details.**
